```

The screenshot shows a Jupyter Notebook titled "1bf24cs171.ipynb" with a menu bar (File, Edit, View, Insert, Runtime, Tools, Help) and a command palette (Commands, + Code, + Text, Run all). The notebook contains a Python script for a Tic Tac Toe game. The code defines a function `tic_tac_toe()` that simulates a game between Player X and Player O. The game board is represented by a 3x3 grid of characters (X, O, or empty space). The game proceeds through several moves, with Player X starting first. The output shows the board state after each move and prompts for the next move. The game ends with Player X winning by having three X's in a row.
